VALVE SUPERSOURCE

VALVE SUPERSOURCE® By Crane Engineering

CRANE ENGINEERING

Fluid Process Equipment | Service & Repair | Installation | Skid Systems | Valve Automation & Design

Crane Engineering is the **SOURCE** for all of your valve needs. We represent industry-leading valve manufacturers. Our extensive inventory allows us to assemble, test, and ship valves the same day!

BALL VALVES

FLO-TITE valves & controls	High quality valves and actuation for commercial and industrial markets
Flow-Tek, A Subsidiary of BRAY INTERNATIONAL, Inc.	Resilient seated, V-ball control and segmented for manual and control service
Max-Air Technology®	Industrial Cast and Forged ANSI Class valves for process and utility applications
Jarecki Valves	Severe service valves for high temperature, high pressure and abrasive applications

BUTTERFLY VALVES

Max-Air Technology®	Triple Offset, high performance butterfly valves, iron body resilient and PTFE seated butterfly valves
ABZ Valve, A GT Company	ANSI Class Triple Offset, high performance and resilient seated butterfly valves for a wide range of applications, manual or automated
CENTER LINE	Ductile iron body, cartridge style seat up to 48"
CRANE FKX	Triple offset for extreme low and high temperature application

CHECK VALVES

DUO-CHEK®	Swing and High performance, non-slam, wafer to 88" and class 2500
DFT The Check Valve Doctor™	Non-slam, spring assisted stem guided up to class 2500
TITAN TITAN FLOW CONTROL	Wafer, lug and flanged style swing and double door
VAL-MATIC®	Outside lever and weight check valves, SwingFlex resilient disk

SANITARY VALVES

DIXON	Full line of sanitary ball, butterfly and check valves, relief and vacuum valves and sanitary specialties
FLOWTREND SMARTER, FASTER FLUID HANDLING SOLUTIONS	Single seat valves, butterfly and check valves, valve repair components
PENTAIR SÜDMO	Single seat valves, double seated mix proof and PMO valves with automation and control, over pressure and hygienic butterfly valves
TRU-FLO	Ball and butterfly valves; fittings for sanitary and pharmaceutical applications
LIAG® VALVE TECHNOLOGY	Free flow shutter valves for sanitary applications, 2-way and multiport configurations
Steel & O'Brien Manufacturing Sanitary Simplified™	Ball, butterfly and sample valves, fittings for sanitary and pharmaceutical applications

Engineered Valves — ITT ENGINEERED FOR LIFE

- **Fabri:** Knife gate valves for pulp and paper, mining, chemical, power, petroleum refining and wastewater applications
- **Dia-Flo:** Industrial diaphragm valves engineered for challenging manufacturing environments including mining, chemical processing, power, pulp & paper, water and waste treatment sectors
- **Pure-Flo:** Hygienic diaphragm valves for the pharmaceutical, bioprocessing, and food and beverage sectors. Superior hygienic design to facilitate both CIP and SIP cleaning with a wide range of body configurations
- **Cam-Line** **Cam-Tite:** Severe service ball valves for hazardous, corrosive critical duty applications found in chemical, mining, power and nuclear industries.

ACTUATORS/AUTOMATION

Max-Air Technology — Pneumatic rack & pinion scotch yoke and electric, limit switches, solenoids mounting kit, electric on/off, modulating quarter turn

rotork — Electric on/off, modulating, quarter turn, and linear actuators

ASCO — 3-way and 4-way solenoids

Automatic Valve — 3-way and 4-way solenoids

BLX — Pneumatic, electro-pneumatic, and smart positioners

INDELAC CONTROLS, INC. — Electric on/off, modulating, quarter turn, and actuators

K-TORK INTERNATIONAL INC. — Pneumatic vane actuators

pyromation — Temperature sensors and assemblies including thermocouples, RTDs, thermowells and accessories

WATER/WASTEWATER

VAL-MATIC — AWWA butterfly, plug and check valves, swing check, swing flex, sugerbuster, air release and vacuum valves, QuadroSpere ball, Ener*G resilient ball, automation packages

BLUE RIBBON — Submersible pressure transmitters for wastewater and sludge applications

ORBINOX — Knife gate, slide gate, sluice gate and check valves

PENN-TROY MANUFACTURING INC. — Mud valves, telescoping valves, floor stands, valve operators and accessories

CONTROL VALVES

NOR'EAST CONTROLS — Domestically manufactured ANSI Class linear globe control valves designed to modulate gases and liquid in industrial applications

COPES-VULCAN — Globe style control for liquid and gas in severe service applications to class 4500 Comprehensive line of desuperheating equipment for steam conditioning applications

Max-Air Technology — Patented diffuser plate high performance control butterfly valves

FLO-TITE valves & controls — Industrial carbon and stainless steel segmented and V-ball for precision modulating applications

spirax sarco — Globe style control valves, pilot operated pressure and temperature control valves for steam and high temperature process applications

SPECIALTY

hydro THERMAL — Direct steam injection heating and cooking systems for industrial, food & beverage applications

GRIFFCO — Back pressure and pressure relief valves, pulsation dampeners, pump accessories

HAYWARD — A leading manufacturer of industrial thermoplastic valves and accessories

ONYX VALVE — USA manufactured pinch valves, duckbill and wafer check valves, ISO rings and pressure sensors

PLAST-O-MATIC VALVES, INC. — Valves for chemical, water/wastewater and ultra-pure applications

STRAVAL VALVES STRAINERS — Pressure regulating valves, back pressure and pressure relief valves

LIAG® VALVE TECHNOLOGY — Product recovery and Pig Diverting Systems for viscous and fast hardening sanitary media
