Process & Equipment Know-How for Improved Reliability & Lower Cost of Ownership

With Crane Engineering, you're getting Certified Equipment Specialists. We're experts at helping you manage your complete fluid system environment for improved reliability, increased uptime and lower cost of ownership. Our services include:

Emergency Repair

When you have an emergency maintenance issue, time is money.

Call Crane Engineering's emergency number at 920-851-9924.

- 24 Hour Emergency Service, 7 Days A Week
- Troubleshoot any kind of fluid system problem
- Minimize your downtime

General Repair – Root Cause

Our Certified Equipment Specialists uncover the root cause behind every repair. We analyze your equipment and your systems to determine if the MTBF is acceptable for the application. Then we can make the appropriate repairs and system recommendations.

- On-Site Repair of Pumps, Gearboxes, Valves and Instrumentation
- Factory Authorized Repair
- Free Tear-Down and Inspection
- One Year Warranty on all work

Preventative Maintenance Contracts

Keep maintenance costs low by preventing failures before they happen. By setting up a PM Contract with Crane Engineering, you can drastically reduce your annual maintenance costs.

- Pumps, Valves, Instrumentation,
- Water/Wastewater Equipment: Lift stations, screens, grit systems, piping, flow meters, clarifier drives, aeration
- Routine Maintenance Contracts
- Calibration
- Performance Monitoring
- Extended Warranty
- Lifecycle Contracts
- Equipment Training Seminars

Exchange, Re-build & Rehabilitation Services

- Pump back-pull-out and power end exchange programs
- Rebuild pumps, gearboxes, mechanical seals, valves, clarifiers, grinders, rotary screens, comminutors, grit units
- Dynamic balancing
- Non-destructive testing
- Complete welding capabilities
- Laser alignment of coupling, jack shafts and v-belt drive arrangements
- Rehab lift stations, pump stations, grit systems, clarifiers

Installation & Start-up Services

We provide single source responsibility for your process modification and installation needs for your entire project.

- Install pumps, valves and other fluid process equipment
- Install Water/Wastewater equipment, including lift stations, blowers, screens, etc.
- Mechanical and Electrical start-up services, including control panels, programming adjustments, etc.
